SOFTWARE DEVELOPER

Diverse expertise in bridging software technology with experience in ERP system development and exposure to industrial power environments. Skilled in backend development, system integration, and web development with practical experience in high-voltage substation protection systems and automation control.

SKILLS

Web development	Mobile development	Data analysis
Backend development	Flutter / Python / Java / JavaScript / PHP / PLC	Critical thinking skills

WORK EXPERIENCE

Electrical & Control Systems Engineer Oct 2025 - Feb 2026

Aden 120MWp PV Project - Aden, Yemen

- Installed and configured protection control panels for high-voltage main circuits.
- Assisted in integration of CT, CVT, and auxiliary transformers into protection circuits.
- Connected protection panels to the SCADA system for real-time monitoring and remote control.
- Assisted in Installing circuit breakers within 33kV switchgear and auxiliary transformers wiring.
- Performed AC and DC control wiring for protection relays, breakers, and automation systems.
- Conducted signal testing, panel functionality testing, and insulation checks.

Software Developer Sep 2024 - Feb 2025

ProSite Yemen - Sana'a, Yemen

- Developed highly customized ERPNext solutions, notably delivering a comprehensive system for the Public Works Project.
- Designed, built, and tested custom ERP modules to extend core functionality and streamline enterprise operational workflows.
- Authored detailed technical documentation and comprehensive user guide for ERPNext systems.

PROJECTS & CERTIFICATES

Samaform Architectural Firm CMS & Client Portal | React, Node.js, PostgreSQL, PHP 2026

- Built custom CMS with complete website customization and content management from a secure dashboard.
- Developed a dynamic client onboarding form to capture complex spatial design plans and project requirements.
- Engineered a RESTful API and database to process multi-step form, image uploads, and organize client data.

International English Language Testing System • Band Score 7.5 2024

Flexiblelea | Dart, C++ Developed cross-platform mobile application for flexible job recruitment that provides more agency for freelancers. 2023

Researched how user experience in e-commerce can be improved by implementing smart contracts in the payment process. 2021

Fundamentals of Deep Learning • MAHSA University 2021

Able to build, train, and fully apply deep neural networks.

Big Data 101 • MAHSA University 2020

Acquired Knowledge on the use case of big data & the application of big data in businesses.

EDUCATION

Bachelor of Information Technology (Hons)	2024
MAHSA University - Malaysia	2:1
Foundation in Science	2019
MAHSA University	
O - LEVEL	2018
IMAS school, Putrajaya
