SOFTWARE DEVELOPER

Software developer with experience spanning full-stack web development and ERP systems with hands-on exposure to industrial power environments. One of my passions is connecting with people through my work, transforming their ideas into lasting, tangible experiences. A tenacious mentality and strong adaptability allow me to execute effectively in any environment, from fast-moving startups to structured engineering teams.

SKILLS

Web development	Python / TypeScript / JavaScript / PHP	Machine learning
Backend development	React / Node.js / Express / Flutter	Workflow automation & AI
Mobile development	Firebase / ERPNext / n8n / PLC	Presenting & reporting skills

PROJECTS

Shams Solutions Bilingual Website | React, TypeScript, Express, Firebase, n8n **2026**

- Built a bilingual website for a Saudi IT firm with server-side rendering, structured data and a dynamic sitemap.
- Developed a Firebase blog with a secure admin dashboard, with blog posts fully automated through an n8n workflow using Claude AI to write and publish bilingual posts on a schedule.
- Engineered an Express server with an SMTP contact form, rate limiting, spam protection and strict security headers.

Lightweight IoT Intrusion Detection System | Python, TensorFlow, Scikit-Learn, NumPy/Pandas **2026**

- Architected an end-to-end ML pipeline to perform anomaly detection on resource constrained IoT networks, tested against traditional architectures detection accuracy, precision, recall, F1, and FPR.
- Engineered a custom sparse autoencoder using TensorFlow library applying L1 regularisation to optimise for low per-batch inference latency.
- Built a scalable data pre-processing model to clean and normalize massive network traffic data using a two stage feature selection algorithm to reduce dataset dimensionality.

SaraBeauty Store Full Stack Website | React, Node.js, PHP, MySQL **2026**

- Engineered a platform featuring a responsive customer facing storefront and secure admin dashboard.
- Developed RESTful APIs to bridge the storefront and database ensuring secure data processing and efficient state management.
- Built a comprehensive admin control panel enabling full CRUD operations for product inventory management, real-time order tracking, and centralized payment oversight.

Samaform Architectural Firm CMS & Client Portal | React, Node.js, PostgreSQL, PHP **2025**

- Built CMS with complete website customization and content management from a secure dashboard.
- Developed dynamic client onboarding form to capture spatial design plans and project requirements.
- Engineered RESTful APIs to process multi-step form, image uploads, and store client data.

Flexibleea | Dart, C++ **2023**

- Developed cross-platform mobile application for flexible job recruitment that provides more agency for freelancers.

WORK EXPERIENCE

Software Developer **Sep 2024 - Feb 2025**

ProSite Yemen - Sana'a, Yemen

- Developed highly customized ERPNext solutions delivering comprehensive systems for the Public Works Project and YemenHR.
- Built YemenHR ERP-integrated portal for tenders and employment opportunities.
- Developed and tested ERP modules to streamline the tendering and bidding processes of projects.
- Authored detailed AS-IS and To-Be technical documentation and comprehensive user guides.

Electrical & Control Systems Engineer **Oct 2025 - Feb 2026**

Aden 120MWp PV Project - Aden, Yemen

- Installed and configured protection control panels for high-voltage main circuits.
- Assisted in integration of CT, CVT, and auxiliary transformers into protection circuits.
- Connected protection panels to the SCADA system for real-time monitoring and remote control.
- Assisted in Installing circuit breakers within 33kV switchgear and auxiliary transformers wiring.
- Performed AC and DC control wiring for protection relays, breakers, and automation systems.
- Conducted signal testing, panel functionality testing, and insulation checks.

CERTIFICATES

International English Language Testing System · Band Score 7.5 **2024**

Fundamentals of Deep Learning · MAHSA University **2021**

Learnt to build, train, and fully apply deep neural networks.

Big Data 101 · MAHSA University **2020**

Acquired Knowledge on the use cases & the applications of big data in businesses.

EDUCATION

Bachelor of Information Technology (Hons) **2024**

MAHSA University 2:1

Foundation in Science **2019**

MAHSA University

O - LEVEL **2018**

IMAS school - Malaysia
