SOFTWARE DEVELOPER

Diverse expertise in bridging software technology with experience in ERP system development and exposure to industrial power environments. Skilled in backend development, system integration, and web development with practical experience in high-voltage substation protection systems and automation control.

SKILLS

Web development	Mobile development	Data analysis
Backend development	Flutter / Python / Java / JavaScript / PHP / PLC	Critical thinking skills

WORK EXPERIENCE

Electrical & Control Systems Engineer Oct 2025 - Feb 2026

Aden 120MWp PV Project - Aden, Yemen

- Installed and configured protection control panels for high-voltage main circuits.
- Assisted in integration of CT, CVT, and auxiliary transformers into protection circuits.
- Connected protection panels to the SCADA system for real-time monitoring and remote control.
- Assisted in Installing circuit breakers within 33kV switchgear and auxiliary transformers wiring.
- Performed AC and DC control wiring for protection relays, breakers, and automation systems.
- Conducted signal testing, panel functionality testing, and insulation checks.

Software Developer Sep 2024 - Feb 2025

ProSite Yemen - Sana'a, Yemen

- Developed highly customized ERPNext solutions delivering comprehensive systems for the Public Works Project and YemenHR.
- Built YemenHR ERP-integrated portal for tenders and employment opportunities.
- Developed and tested ERP modules to streamline the tendering and bidding processes of projects.
- Authored detailed AS-IS and To-Be technical documentation and comprehensive user guides.

PROJECTS & CERTIFICATES

Samaform Architectural Firm CMS & Client Portal | React, Node.js, PostgreSQL, PHP 2026

- Built CMS with complete website customization and content management from a secure dashboard.
- Developed dynamic client onboarding form to capture spatial design plans and project requirements.
- Engineered RESTful APIs to process multi-step form, image uploads, and store client data.

International English Language Testing System • Band Score 7.5 2024

Flexiblelea | Dart, C++ Developed cross-platform mobile application for flexible job recruitment that provides more agency for freelancers. 2023

Researched how user experience in e-commerce can be improved by implementing smart contracts in the payment process. 2021

Fundamentals of Deep Learning • MAHSA University 2021

Learnt to build, train, and fully apply deep neural networks.

Big Data 101 • MAHSA University 2020

Acquired Knowledge on the use cases & the applications of big data in businesses.

EDUCATION

Bachelor of Information Technology (Hons)	2024
MAHSA University - Malaysia	2:1
Foundation in Science	2019
MAHSA University	
O - LEVEL	2018
IMAS school, Putrajaya
